IDEAS FOR CHATTERPIX WITHIN GUIDANCE LESSONS AND GROUP LESSONS

- Take a picture of the main character that you are reading for a lesson or a group and have the students talk about what that character's personality is or how they coped with a challenge. Example: When Sophie was really, really angry. You could have them voice Sophie and have her talk about how she coped with being really angry. They can share out afterwards.
- During group time have students interview one another. Have them take a picture of the person they are interviewing and do a ChatterPix to explain the other person. Fun for the kiddos!
- During a career lesson have the students find a picture of an individual in that career. After doing the research on that career use the picture for ChatterPix to explain that particular career.
- Use ChatterPix to explain who your school mascot is and what they are about. "Example we have Herbie the Husky and I used ChatterPix to have him talk to the students about our 4 PBIS school wide expectations."

WHAT IS FLIPGRID

Flipgrid is a learning platform that meets students where they are at with 21st Century technology. Students share ideas together through video and comment on each other's work. All within the confines of what the teacher is asking them to do. It is a win/win and their level of engagement is through the roof :) Did we mention it is completely free to educators??

Flipgrid is comparable with the majority of devices that have the capability to record video.

WHAT IS FLIPGRID

FOUR OF FLIPGRID

FLIP GRID IDEAS

- Character Education lessons- Assign character education traits and students can video how they describe that trait
- Career Education lessons-students video one of the 16 career clusters and describe it to their classmates
- Interview a classmate at the beginning of the school year. Video the interview
- During a group session, have the students act out the topic and make a grid out of the performances
- During a Diversity lesson, create a grid for “How many ways I’m unique.”
- The opportunities are endless...

PRACTICE WITH FLIP GRID

What do you love about School Counseling?

What have you learned from WSCA so far you are so excited about bringing back to your program?? We'll take about 10 min.

WHAT IS SEESAW?

Seesaw is a student driven digital portfolio.

Students are independent as they work through activities, drawings, photos, videos, and links. Parents have the capability to comment on their child's work. Very interactive in nature. Free version is available.

One: Everyone Can Count Handout

Name _____

Everyone Can Count!

I know that I count because

I stand up my self

We can include others by including them

I can help others count by Helping others

We can take a stand by Saing no and no thack you
