**NOTE:** Wisconsin has phased out the Wisconsin Comprehensive School Counseling Program standards and is now using the ASCA Student Standards: Mindsets & Behaviors for Student Success. WSCA has aligned the WSCPAR to reflect the ASCA model more closely while simplifying the submission process. *Please use caution when reviewing previous Program of Promise winners. There are new data requirements, templating, and SMART goal requirements for the 2019-2020 & 2020-2021 Wisconsin School Counseling Program Accountability Report.*
Dear School Counselor Colleagues,

For over 15 years the Wisconsin School Counselor Association (WSCA) has offered Wisconsin school counselors the opportunity to highlight their school counseling program through the Wisconsin School Counseling Program Accountability Report (formerly known as the SPARC-W). This continuous improvement document puts students at the center of the school counseling program and demonstrates the school counselor commitment to getting results.

We hope that you will find the WSCPAR useful in:

- Presenting a self-evaluation of your school counseling program.
- Preparing/analyzing results that guide programming to provide equitable access for all students to achieve their academic, social/emotional, and career/post-secondary goals.
- Promoting your program to your school administration, school board, community partners, businesses, and parents/caretakers.
- Preparing reports for professional assessment, school accreditation, grants, awards, or recognition.

The WSCA WSCPAR committee is excited to review applications again this fall! The work school counselors are doing on behalf of students is inspiring and we are looking forward to sharing your counseling program stories (WSCPAR) with stakeholders.

NEW this year, WSCPAR applications will be submitted online at https://www.wscaweb.org/awards-scholarships/wscpar/. Note, your entire application must be submitted at the same time and cannot be saved before submission. Make sure you have all your applications components completed before starting the online application.

If you would like to have a professional review of your WSCPAR for a Program of Promise recognition, please submit your online application by Monday November 20, 2023, at 5:00pm. Please make sure to follow the directions and requirements delineated in the WSCPAR application for full consideration.

WSCA is committed to providing supports and resources to school counselors so they can confidently and effectively complete a WSCPAR. You will find answers to many of your questions about the WSCPAR in this handbook. Also note resources available through our technical assistance page as well as contact us with any questions you may have at data@wscaweb.org.

Cindy Bourget & Sarah Flier
WSCA Data & ASCA Model
Co-Directors
Online Application Requirements

The following information will be entered into the online application. **Note, your entire application must be submitted at the same time and cannot be saved before submission. Make sure you have all your applications components completed before starting the online application.**

- School and Counselor Contact Information
- Elected Official Names
- Local Newspaper & Contact Information
- Counselor Reflection Statements:
  - Explain the process you or your team engaged in to complete the WSCPAR and a distribution plan for your document.
  - What implications did you or your team consider after reviewing the results from your program or interventions?
    - Implications explain how data results will help:
      - Deliver lessons more effectively (considering content, strategies, time).
      - Collect data more accurately (asking better questions based on quality content).
      - Target ASCA Mindsets & Behaviors.
      - Make decisions about which lessons to continue, add or discontinue.
  - How does the data you shared in your WSCPAR show how your counseling program addressed equity and/or opportunity gaps for students?

Please note the following documents must also be uploaded with your online WSCPAR application:

- [ ] Application Signature Page (All signatures required to be reviewed)
- [ ] Completed WSCPAR Self Score Rubric
- [ ] Wisconsin School Counseling Accountability Report (WSCPAR) Document
  - The WSCPAR document must fit (back and front) on one 8½” x 11” sheet of paper.
- [ ] Completed Annual Student Outcome Goal Plan Template #1
- [ ] Completed Annual Student Outcome Goal Plan Template #2
  - A minimum of one goal must be a Closing the Gap goal.
- [ ] Completed and Signed Annual Administrative Conference Form
  - Note, there is not an expectation that all the program components will be completed at the time of application submission.

The WSCPAR is a public document and should not have typographical, grammatical, or mechanical errors. In addition, WSCPAR documents are a formal document and should be written in third person, not first person (i.e., “The school counselor taught three lessons…” not “I taught three lessons…”).

Applicants are encouraged to use the WSCPAR templates provided on the WSCA website. If you choose to not use the templates provided note the following requirements:

- Only WSCPAR’s with size 10 or 12 fonts will be considered for an award. An 8-point font is acceptable for your graphs and standards. Arial or Times New Roman font is recommended.
- Please make sure that your text is legible for all graphs and narrative sections of the WSCPAR.
- All components and prompts in the WSCPAR template must be used in the WSCPAR.
- Each acronym needs to be spelled out the first time it appears in the document.

We encourage you to find WSCPAR editorial assistance, it is always helpful to have someone read your WSCPAR for clarity of content. Questions about the WSCPAR? Email data@wscaweb.org.

**Online Application Deadline Monday, November 20, 2023, 5:00 pm**
The WSCPAR document is based on the ASCA national model (4th edition) results report. Results report data is collected by the school counseling program to demonstrate how students are different due to their participation in the counseling program, activity, or intervention. Additional components of the ASCA model in the WSCPAR application include Annual Student Outcome Goals and the Annual Administrative Conference.

Implementing a data informed school counseling program is outlined in the ASCA Ethical Standards for School Counselors and the ASCA School Counselor Professional Standards & Competencies. According to the “ASCA National Model: A Framework for School Counseling Programs (4th Edition)” Data-informed school counseling includes (p.32):

The school counseling program’s focus and direction are based on student needs as determined through a review of the school’s data. Understanding and using data are essential to ensuring equitable services and that every student receives the benefits of the school counseling program.

A data-informed school counselor consistently reviews school data to reveal trends across grades or years, inequities in student achievement, opportunity, or attainment; and student needs revealed by changes such as school attendance, disciplinary problems and/or academic performance. A data-responsive school counselor further uses data to determine if school counseling program strategies, interventions, and activities are effective and to make decisions about future practice.

**Data Operational Definitions**

The WSCPAR gives school counselors a format to share their school counseling program stories using data. All three data types are important to sharing the impact your counseling program has on students. The following three definitions of data are taken from Making Data Work (4th edition) by Anita Young, Ph.D. and Carol Kaffenberger, Ph.D. (2018) and the “ASCA National Model: A Framework for School Counseling Programs (4th Edition, 2019)”

**Participation Data**

A central tenant of the school counseling program is that it is to be delivered to all students. Participation data answers the question, “Who participated in what activities?” (ASCA Model p. 35) This includes the “number of students involved in the program or intervention, the number of sessions and length of sessions” (Making Data Work p. 58).

**Mindsets & Behaviors (Perception) Data**

Mindsets & Behaviors data show what progress students have made toward attending the ASCA Mindsets & Behaviors standards and answers the question, “What did students learn through participation in school counseling activities?” (ASCA Model p. 35) Making Data Work (p. 58) defines Mindsets and Behaviors as data describing individuals’ attitudes, knowledge, and skills.

**Outcome Data**

Outcome data answers the question, “How did the learning affect students’ achievement, attendance, or discipline? (ASCA Model p. 36). Young and Kaffenberger define outcome data as showing the impact of the intervention on student achievement, attendance, or discipline (p. 59).
At times, data types may not seem clear. ASCA has created data classification examples for Recognized ASCA Model Program applicants to further clarify how to categorize data. Further details can be found on the ASCA website https://www.schoolcounselor.org/getmedia/4d8cb19a-5e85-4990-a8b8-53dc5e475d1c/4th-Data-Classifications.pdf.

</tbody>
</table>
When sharing your WSCPAR document with others you will discover that attention is quickly drawn to the charts and graphs. The following resources will help you create strong visual components of your school counseling story in your WSCPAR. **Note, starting with the October 2024 RAMP submissions, ASCA is requiring At-A-Glance Bar Graph(s) and will no longer grant points for pie charts.** [Click here to review the 2024 RAMP rubric for further information](https://hbr.org/2020/02/present-your-data-like-a-pro).

### Graph & Chart Hints

- Make sure your data can be seen
- Focus most on the points your data illustrates
- Share one — and only one — major point from each chart
- Label chart components clearly
- Visually highlight “Aha!” zones
- Write a slide title that reinforces the data’s point
- Present to your audience, not to your data

### Pie Graphs/Charts

Pie graphs/charts “are useful in illustrating percentages and proportions in relation to each other and to the whole. We recommend that no more than five segments be shown in a single pie graph and that the largest segment (sometimes called a slice, sector, or wedge) start at 12 o’clock, with the remaining sections following clockwise” (Nicol & Pexman, 2010).

**Effective Elements for Pie Graphs/Charts:**

- Segment labels are all horizontal.
- Pie segments can easily be distinguished from one another (in color and grayscale).
- There are no more than five segments in a single pie graph.
- A legend is provided that identifies the segments or all segments are labeled.
- Negative numbers are not illustrated.
- Percentages total equal 100.

### Pie Chart Example

![Pie Chart Example](chart.png)
Bar/Column Graphs

Bar graphs are useful in presenting or comparing differences between groups or how groups differ over time (Nicol & Pexman, 2010).

Checklist of Effective Elements for Bar Graphs (Nicol & Pexman, 2010):

- Graph has a title.
- Both x and y axes are clearly labeled and are parallel to the axes (if possible).
- The dependent variable is on the vertical (y) axis (unless there is a reason to put it on the y-axis).
- The y-axis/x-axis length ratio is appropriate.
- The highest values on the x-axis and y-axis scales are larger than the highest data values.
- Bars representing different independent variables within the graph can be clearly differentiated from one another in color and gray-scale. (Demonstrate IMPACT)
- Bars are the same width.
- Bars are labeled with the value of that data point.

Click here to see sample At-A-Glance Bar Graph(s) from ASCA.

Technical Assistance

If you have any questions or concerns about the WSCPAR, please feel free to contact the WSCPAR Directors, Cindy Bourget and Sarah Flier at data@wscaewb.org. The WSCPAR process is non-competitive; every school that meets the demands of the rubric will receive an award.

WSCA provides extensive technical assistance, coaching and consultation:

- WSCA ASCA Coffee Chats, join a network of other counselors implementing a model program
- Conference Sectional Offerings & ASCA Model Consultations
- Virtual “Drop in” Consultation Dates in October 2023
- On demand quick tip videos and webinars via the WSCA online learning program
- Virtual Coaching and Consultation requests are available at no cost to WSCA members
- WSCA ASCA Model training throughout the state. One day WSCPAR and RAMP camps to provide support in completing the application
- Click here to learn more about the support available to counselors working towards implementing the ASCA model in the WSCA professional development catalog.

</tr>
<tr>
<td>80-89 AND/OR One or more &quot;Does Not Meet Expectations&quot; (0 score)</td>
</tr>
<tr>
<td>Detailed feedback and opportunity to resubmit for Program of Promise Award</td>
</tr>
<tr>
<td>79 and below</td>
</tr>
<tr>
<td>Eligible for mentoring to apply in Fall 2024</td>
</tr>
</tbody>
</table>

While the difference between exceeds expectations, meets expectations, and minimally meets expectations is subjective, we encourage you to use language that reflects a stronger commitment.

An email will be sent to the "Individual Completing Application" when the online application is submitted. You will be notified via email before January 10, 2024, as to the final status of your WSCPAR Program of Promise application. No queries will be answered regarding application status before December 4, 2023.

PoP winners will be acknowledged at the WSCA National School Counseling Week Breakfast on February 9, 2024, as well as at the 2024 WSCA Conference.
SECTION 1
DOCUMENT HEADER

The document header is the first item a potential reader’s eyes should focus on when one first views a Wisconsin School Counseling Program Accountability Report. Therefore, the document header should include important identifying information. Please refer to the list below and the scoring rubric.

In the document header the following items must be included:

- The title of the document “Wisconsin School Counseling Program Accountability Report”
- The year “2019-2020 & 2020-2021”
- The following statement: “A continuous improvement document sponsored by the Wisconsin School Counselor Association”
- School Name*
- School Address*
- School Phone Number*
- School Website*
- Number of Students Enrolled at the School*
- Grade Levels i.e., K-5, 6-8, or 9 -12*
- Student Demographics (% Free or Reduced, English Language Learners, Special Education, Racial breakdown)
  - This data can be found in the DPI WiseDash Portal or your school Student Information System.
- Principal’s Name*
- Name(s) of the School Counselor(s)*

*A WSCPAR document representing the school counseling program provided by one counselor at multiple schools/buildings must provide all of the above school information for each school/building. If your district or school has a unique structure, please reach out to the data team for support in completing the document header a minimum of ten business days before the due date.

<table>
<thead>
<tr>

<td>0</td>
</tr>
<tr>
<td>Includes all components of document header - Required, no points awarded</td>
<td></td>
<td></td>
<td></td>
<td>Not all components included in header</td>
</tr>
</tbody>
</table>
SECTION 2
RESULTS REPORT

Results are the outcome of what students do; not what adults do. Results and outcome data are not the number of students seen, number of meetings, conferences, or classes held, or the number of referrals to other agencies or programs (See operational definitions on page 3 of this document for clarification of different types of data.) Student outcome data is required for a minimum of one data set in this section to show how your school counseling program has demonstrably impacted students.

A WSCPAR document representing the school counseling program provided by one counselor at multiple schools/buildings may provide student results from any building served by that one school counselor.

Presenting your results in graphic form (pie charts, graphs, etc.) and their relationship to the ASCA Student Standards: Mindsets & Behaviors for Student Success are essential components for this section. You can use Microsoft Excel/Google Sheets to create a variety of graphs or charts.

This section must include interventions/activities based on two out of three of the following domains: Academic, Career, Social/Emotional.

Helpful Hints:
● The relationship between the data presented and the school counseling program should be clearly stated.
● Do your business, math, computer applications departments or service organizations on campus want to crunch numbers for you? Do you have an intern doing a practicum or fieldwork hours at your school who would want to help with your WSCPAR?
● Keep your graphs simple to read – focus on one concept per graph. Think USA Today simple!

Your work in this section may be enhanced by reviewing the following ASCA National Model (4th Edition) templates: Closing the Gap Action Plans/Results Report (p.52-54) and Annual Student Outcome Goal (p.39-45).

Questions to reflect on when completing the student results section:

Academic
● Is there an identified academic achievement gap in your building? If so, what is it and who does it impact?
● Has your department done any school counseling curriculum related to skills to help students succeed academically? What were the lessons?
● Have you gathered data related to the outcome of targeted individual conferencing or short-term counseling? Did students’ grades improve? Was attendance impacted? Did discipline referrals go down? What was the outcome?

Social/Emotional
● Do you run any groups for a target population of students who are struggling? How are students identified, and do you have a way to follow up to see if they have shown improvement since being involved in the group (e.g. fewer discipline referrals, attendance improved, GPA increased)?

Career
● Do your students have the opportunity to demonstrate, role play, illustrate a skill, give an example or solve a problem that displays their understanding of a career standard? Do you collect information on your students' own level of knowledge (survey), recount facts, define, describe or list to display their understanding of the career standards?
● Do you have lessons that expose students to career research that they can access and use on their own? Do you have a way to measure if they are using it on their own?
### Examples of ASCA Student Standards: Mindsets & Behaviors for Student Success

*Note, ASCA does not recommend measuring mindset standards as they are difficult to quantify. See page 26 of the ASCA National Model Implementation Guide: ASCA Student Standards for further details.*

**Category 1: Mindset Standards (MS)**
School counselors encourage the following mindsets for all students

- M 4Self-confidence in ability to succeed

**Category 2: Behavior Standards (BS)**
School counselors provide culturally sustaining instruction, appraisal and advisement, and counseling to help all students demonstrate:

- B-LS 3. Time-management, organizational and study skills
- B-SMS 6. Ability to identify and overcome barriers
- B-SS 7. Leadership and teamwork skills to work effectively in diverse groups

Additional information on ASCA Student Standards: Mindsets & Behaviors for Student Success can be found at [www.schoolcounselor.org](http://www.schoolcounselor.org).

---

**RESULTS REPORT**

**RESULTS REPORT: Data Set #1 (Must contain Outcome Data - Attendance, Discipline, Achievement)**

*Data Set #1 must include a minimum of one outcome data chart.* Additional data can be included but is not required.

*Note: At least ONE data set MUST be Outcome Data to be awarded Program of Promise*

#### Explanation for why student population chosen | Student Need

- Describes how students were identified through data (e.g., school profile, school improvement plan/goals, disaggregated data reports, etc.)
- Provides an explanation of how it addressed student needs (Students with Office Discipline Referrals lose instruction time. Students not attending school may feel disconnected, etc.)
- Explicitly explains academic, discipline or attendance discrepancies

- Describes how students were identified through data (e.g., school data profile, school improvement plan/goals, disaggregated data reports, etc.)
- Provides an explanation of how it addressed student needs (Students with Office Discipline Referrals lose instruction time. Students not attending school may feel disconnected, etc.)

---

#### Written explanation for how intervention/ activity was selected | Action Plan

- Describes how best practice, action research, evidence based, or research informed activities were selected (i.e., why you selected the evidence based group curriculum, research that supports activities selected, etc.). AND
- Describes how students will be different as a result of participating in this activity. - 3 points awarded

- Describes how best practice, action research, evidence based, or research informed activities were selected (i.e., why you selected the evidence based group curriculum, research that supports activities selected, etc.). OR
- Describes how students will be different as a result of participating in this activity. - 1 point awarded

- Describes how best practice, action research, evidence based, or research informed activities were selected (i.e., why you selected the evidence based group curriculum, research that supports activities selected, etc.). AND
- Does not adequately describe why activity was chosen

- Does not adequately describe student impact

**Results Report Title**

- Description of Activity, Intervention or Program - 1 point awarded
- Did not include Title

**List ASCA Model Domain**

- Lists ASCA Domain - 1 point awarded
- Did not list ASCA Domain

**List ASCA Mindsets & Behavior Standard**

- Lists 1-2 ASCA Mindsets and Behaviors - 1 point awarded
- Listed more than 2 ASCA M&B Standards
- Did not list any ASCA M&B Standards

**Explanation for why student population chosen | Student Need**

- Describes how students were identified through data (e.g., school data profile, school improvement plan/goals, disaggregated data reports, etc.)
- Provides an explanation of how it addressed student needs (Students with a high number of Office Discipline Referrals may be losing instruction time when out of the classroom to resolve issues, Students not attending school may feel disconnected to the school community, etc.)
- Explicitly explains academic, discipline or attendance discrepancies

- Describes how students were identified through data (e.g., school data profile, school improvement plan/goals, disaggregated data reports, etc.)
- Provides an explanation of how it addressed student needs (Students with a high number of Office Discipline Referrals may be losing instruction time when out of the classroom to resolve issues, Students not attending school may feel disconnected to the school community, etc.)

- Describes how students were identified through data (e.g., school data profile, school improvement plan/goals, disaggregated data reports, etc.)

**Written explanation for how intervention/activity was selected | Action Plan**

- Describes how best practice, action research, evidence based, or research informed activities were selected (i.e., why you selected the evidence based group curriculum, research that supports activities selected, etc.).
- AND
- Describes how students will be different as a result of participating in this activity. - 3 points awarded

- Describes how best practice, action research, evidence based, or research informed activities were selected (i.e., why you selected the evidence based group curriculum, research that supports activities selected, etc.).

- Describes how best practice, action research, evidence based, or research informed activities were selected (i.e., why you selected the evidence based group curriculum, research that supports activities selected, etc.).

- OR
- Describes how students will be different as a result of participating in this activity. - 1 point awarded

- Does not adequately describe why activity was chosen AND
- Does not adequately describe student impact

**Written explanation connecting school counseling program activity to the results pictured in the graph | School Counselor Role & Reflection**

- Describes the school counselor or school counseling program role in the activity seen in the graph.
- **Thoroughly** provides an explanation of how this data will support the school counseling program to:
  - Deliver interventions/activities more effectively (considering content, strategies, time).
  - Collect data more accurately (asking better questions based on quality content)
  - Target ASCA M&B Standards
  - Make decisions about which interventions/activities to continue, add or discontinue

- Describes the school counselor or school counseling program role in the activity seen in the graph.
- Provides a **minimal** explanation of how this data will support the school counseling program to:
  - Deliver interventions/activities more effectively (considering content, strategies, time).
  - Collect data more accurately (asking better questions based on quality content)
  - Target ASCA M&B Standards
  - Make decisions about which interventions/activities to continue, add or discontinue

- Describes the school counselor or school counseling program role in the activity seen in the graph.
- Provides no explanation of how this data will support the school counseling program to:
  - Deliver interventions/activities more effectively (considering content, strategies, time).
  - Collect data more accurately (asking better questions based on quality content)
  - Target ASCA M&B Standards
  - Make decisions about which interventions/activities to continue, add or discontinue

*Does not describe the school counselor or school counseling program role in the activity seen in the graph.*

SECTION 3
ANNUAL STUDENT OUTCOME GOALS

This section must include two (2) Annual Student Outcome Goals for the 2023-2024 school year. Annual Student Outcome Goals MUST use OUTCOME DATA and be written in a single sentence using the SMART Goal format. One Annual Student Outcome Goal must address closing education opportunity gaps. Each goal must include a completed Annual Student Outcome Goal form.

This section should reflect some of the identified needs from your data review reflection. What gaps do you notice in student’s ability to fully engage in your school community when reviewing your school improvement plan, DPI school report cards and academic, attendance and discipline needs.

Some ideas for this section:

- Select a school counseling activity that specifically targets an academic, attendance or behavioral discrepancy
- Identify academic gaps by subgroup (race, ethnicity, sex, grade, ELL, etc.)
  - Examples could include:
    - Students not meeting expected test scores or academic benchmarks
    - Students failing core-content courses
    - Students not on track for graduation
- Identify attendance needs by subgroup or category (specified number of absences, early check-out or late arrival)
  - Examples could include:
    - Students who have demonstrated a pattern over time of excessive absences
    - Students within a particular subgroup that miss more days than other groups
    - A specific class or period during which higher absences are noted
    - Student missing instruction due to tardies or “visiting” non classroom spaces
- Identify discipline discrepancies by subgroups or offenses (peer conflict, bullying, aggression, site or time of offense, etc.)
  - Examples could include:
    - Students with two or more official discipline offenses recorded during the first term
    - Students with one or more discipline offenses recorded within a specific category (peer-on-peer conflict, aggressive behavior, disruptive behavior, etc.)
    - Students with three or more behavior referrals for behavior problems
    - Gender gaps in discipline referrals

Helpful Hints:

- Don’t commit in writing to more than your team can deliver.
- Your Student Learning Objectives (SLOs) may translate into Annual Student Outcome Goals.
- Results from prior years’ Annual Student Outcome Goals can be reported in the Student Results sections of the WSCPAR document.
- Identify your baseline data and how you want students to be different.

Your work in this section may be enhanced by reviewing the following ASCA National Model application (4th edition): Annual Student Outcome Goals (p.41-45) and Use of Data (p.32-40).
This section must include two (2) Annual Student Outcome Goals written in a single sentence using the SMART Goal format. WSCPARD document representing the school counseling program provided by one counselor at multiple schools/buildings may provide two Annual Student Outcome Goals from any building served by that one school counselor.

</tbody>
</table>

**Annual Student Outcome Goal #1**

- 2023-2024 School Year
- Address achievement, attendance and/or discipline
- Are based on school outcome data
- Explains academic, discipline or attendance discrepancies
- Are written in SMART format using outcome data (including baseline and target)
- Are unmistakably linked to the school’s data and student needs (Supplemental Data)
- Identify one–two ASCA Mindsets & Behaviors most relevant for this targeted group and goal.
- List One–two learning objectives/competencies based on the ASCA Mindsets and Behaviors listed.
- Possible Activities/Strategies/Interventions by School Counselors are listed.

**Annual Student Outcome Goal #2 (Closing the Gap Goal): Closing the Gap program goal is clearly defined using the SMART Goal format (single statement)**

- 2023-2024 School Year
- Focus attention on equity or opportunity gaps
- Address achievement, attendance and/or discipline
- Are based on school outcome data
- Explains academic, discipline, or attendance discrepancies
- Are written in SMART format using outcome data (including baseline and target)
- Are unmistakably linked to the school’s data and student needs (Supplemental Data)
- Identify one–two ASCA Mindsets & Behaviors most relevant for this targeted group and goal.
- List One–two learning objectives/competencies based on the ASCA Behaviors listed.
- Possible Activities/Strategies/Interventions by School Counselors are listed.
**APPLICATION & FORMAT**

The WSCPAR is a public document to be used by counselors to promote your program to your school administration, school board, community partners and businesses and parents/guardians; prepare reports for professional assessment, school accreditation, grants, awards or recognition; and should not have typographical, grammatical, or mechanical errors. In addition, WSCPAR documents are a formal document and should be written in third person, not first person.

Questions to reflect on prior to your Annual Administrative Conference with your principal:

- Is your building principal aware of how students are different because of the school counseling program?
- Can your building principal cite specific examples of how the school counseling program activities/initiatives have impacted students (academically, behaviorally, or career/educational choices)?
- Do you meet regularly with your building principal to discuss the school counseling program?
- Is your building principal aware of the ASCA Student Mindsets and Behavior Standards?
- Is your own understanding of the school counseling standards strong enough to explain what they are and how your program uses them to your principal?
- Is your building principal aware of your goals for improvement from last year?
- Do you have results from your goals for improvement from last year that you can share with your principal?

Required WSCPAR Components

Refer to the 2022-2023 WSCPAR rubric for specific information on WSCPAR components and scoring. A fillable WSCPAR template is also available on the WSCA website.

**DOCUMENT HEADER**

The following items must be included:
- The title of the document “Wisconsin School Counseling Program Accountability Report”
- The following statement: “A continuous improvement document sponsored by the Wisconsin School Counselor Association”
- The year “2022-2023”
- School Name*
- School Address*
- School Phone Number*
- School Website*
- Principal’s Name*
- Name(s) of the School Counselor(s)*
- Number of Students Enrolled at the School*
- Grade Levels i.e., K-5, 6-8, or 9-12*
- Student Demographics ( % FR, ELL, Special Ed, Racial breakdown)
  - This data can be found in the DPI WiseDash Portal or your school Student Information System.

**RESULTS REPORT (3 Data Sets)**

This section must include an activity or intervention based on one of the following domains: Academic, Career, Social/Emotional. *Data Set #1 must include a minimum of one outcome data chart. Data Set #2 & #3 must include a minimum of one Mindsets & Behaviors or Outcome data chart.* Additional data can be included but is not required.

For each data set include the following prompts (information in this area MUST connect to the graph for each data set). Check the rubric before submitting to verify and confirm that you have met all the requirements for each section below! Do not overthink your responses, just enter what is asked.

**Results Report Title:** (make sure this links to the title of your graph -very briefly describe activity, intervention, or program)

**ASCA Model Domain:** (Academic, Career, Social/Emotional)

**Mindsets & Behaviors Standard:** (maximum of two – make sure they are linked to the date in your chart)

**Student Need(s):** (why did you chose this intervention, activity, program for these students, describe your pressing concern)

**Action Plan:** (describe why you chose the intervention, program, group, lesson to meet your students’ needs and how you wanted it to impact your students)

**Participation Data:** (# of students participating, grade level, number of lessons/sessions, length of lessons/sessions)

**School Counselor Role & Reflection:** (describe the school counselor or school counseling program role in the activity seen in the graph and explanation of how this data will support the school counseling program)

**2023-2024 ANNUAL STUDENT OUTCOME GOALS (2)**

This section must include two (2) Annual Student Outcome Goals for the 2023-2024 school year. These Annual Student Outcome Goals must be written in a single sentence using the SMART Goal format using OUTCOME DATA. A WSCPAR document representing the school counseling program provided by one counselor at multiple schools/buildings may provide two Annual Student Outcome Goals from any building served by that one school counselor. *One goal must be a closing the gap goal. Each goal must include a completed Annual Student Outcome Goal form.*
Supporting Students with Minor Office Referrals

ASCA Model Domain: Social/Emotional
Mindsets & Behaviors Standard: B-SS 3. Positive relationships with adults to support success

Student Need(s): Male students with over 20 minor discipline referrals in the 2021-22 school year were identified as needing support at the beginning of the 2022-23 school year. Most referrals were for disrespect and non-compliance causing them to miss instructional time as well as disrupting the classroom.

Action Plan: A research-based solutioned focused group curriculum was utilized with the identified students to help them with goal setting, emotional regulation, communication, and relationship skill development. With increased skills in these areas, they will have more strategies to deal with challenges in the classroom and reduce the number of referrals and increase instructional time in the classroom.

Participation Data: Nine male sophomore students participated in a weekly small group eight times for 45 minutes.

School Counselor Role & Reflection: All school counselors met individually with potential students about their participation in the group. Two school counselors co-facilitated the weekly group. The group was highly effective in reducing the number of minor discipline referrals. Other positive outcomes included increased attendance and improved homework completion. Students self-reported stronger connections with school staff and feeling more welcomed in the school community. This group will continue in the future with additional incorporation of emotional regulation into lessons.

Disruption Behavior Referrals for Group Members

Increasing Seniors Earning Dual Credit

ASCA Model Domain: Academic
Mindsets & Behaviors Standard: B-LS 8. Engagement in challenging coursework

Student Need(s): Student enrollment in dual credit courses is increasing, however, successful completion of these credits has not matched enrollment increases. This negatively impacts students’ transcripts and self-confidence.

Action Plan: Students successful completion of dual credit in high school increases post-secondary success. Counselors developed personalized success plans for each student enrolled in dual credit using current best practice guidance for increasing academic success. Counselors met with students and identified needed areas of support and connected students with tutoring, mentors, guided study halls, peer tutoring and summer programs. With individualized supports to meet the unique needs of students the goal was for them to increase credit attainment for their dual credit course work.

Participation Data: 50 seniors enrolled in dual credit courses, school counselors met with all these seniors a minimum of one time for 30 minutes and created a success plan. 21 students continued monthly check-ins on their plans.

School Counselor Role & Reflection: School counselors worked with students to create individual success plans and continued to meet monthly with students needing ongoing support. Students reported they felt more supported in their dual credit courses. While there were gains in credit attainment, there is still work to do in this area. Parents and teachers will be added to success plan conferences next year as well as creating a summer success course for rising seniors. School counselors will also complete additional disaggregation of data will also help increase ALL students having access and support to complete dual credit courses.
Increasing Career Readiness
ASCA Model Domain: Career
Mindsets & Behaviors Standard: B-LS 7. Long- and short-term academic, career and social/emotional goals

Student Need(s): The National Career Readiness Certificate (NCRC) data showed that students were not prepared to enter the workforce. Students were surveyed to find out what may be impacting their achievement in obtaining this certificate. Students reported they did not understand “why” they were working towards the National Career Readiness Certificate (NCRC). Students needed to increase their knowledge and understanding of how the NCRC connected and helped them achieve their post high school plans.

Action Plan: Research shows students knowing the “why” increases engagement and participation. Based on this research and since all students work towards the NCRC, classroom lessons were created to help students better understand the connection between NCRC and their post high school plans. This included bringing in industry and business partners to connect the certificate and workforce. The NCRC was also incorporated into Junior conference for individual planning.

Participation Data: 155 Juniors took the NCRC. 155 Juniors attended 2 – 30-minute classroom lessons on Career Readiness and 145 Juniors participated in individual one-hour conferences with school counselors discussing career readiness.

School Counselor Role & Reflection: School counselors delivered the career readiness classroom lessons and facilitated junior conferences. Students reported an increased understanding that this certificate can help them post high school which lead to a significant increase in engagement in career readiness activities. Counselors will continue to educate and support student career readiness awareness in the future.

2023-2024 Annual Student Outcome Goals

Goal #1
By June 2024, the percent of non-white students enrolled in AP classes passing the AP exam with a score of 3 or higher will increase by 6% from 85% (previous year) to 90%.

Goal #2
By the end of the 2023-2024 school year, 9th grade male students receiving special education services that missed more than 10+ days of school in 8th grade will decrease the total number of days absent (previous year) by 10% from 126 to 113.
